REMOTE PROFESSIONAL

[linkedin.com](#)
[github.com](#)
[online portfolio](#)

Broad-minded **Software Developer & Mechatronics Engineer** engaged in various educational endeavors. Pursuing mastery in back-end technologies with Ruby and JavaScript (Node.js).

I value **curiosity, creativity, rationalism, open-mindedness and passion** for exploration and improvement.

Non-professionaly I spend my time tinkering with **electronics, woodworking, digital art and coding passion-projects**. While I like to be up to date with AI, Space exploration and Neuroscience news the most, I'm also interested in biology, robotics, archeology, linguistics, chemistry and global finance.

My favorite cuisines are Indian and Thai and I think every pizza deserves love.

Career

- 11/2021 - now** Senior Software Developer for Marketer (Oslo)
Working in property marketing domain for a Norwegian client via iRonin.it
